Bolle suspension

design Paola Navone, 2022

Lampe Bolle à suspension à lumière directe. L'abat-jour est en métal laqué disponible en nombreux couleurs.

Le câble de suspension électrique est recouvert de soie noire d'une longueur de 2,5 m.

Couleurs et matériaux

Structure

Métal orange papaya

Métal bleu ciel

Metal blanc

Métal bleu ocean

Métal bronze

Metal corde

Métal fango

Métal jaune doré

Métal jaune pastel

Métal graphite

Métal gris cendre

Métal gris claire

Métal marron

Metal noir

Métal ocre

Métal rose poudre

Métal rosso

Métal rouge bulgare

Métal rouge cerise

Métal vert pin

Métal vert sauge

Metal vert foncé

Acier blanc perle

Acier bleu turquoise

Acier bleu saphir

Dimensions

A (cm)	B (cm)	C (cm)
(inch)	(inch)	(inch)
45	75	75
17,7	29,5	29,5

Certifications matériaux

Metal vert foncé

The technologies used in the previous phase of powder coating play a fundamental role in the final result of the processing. They are in fact essential to increase adherence paint on the metal surface and then guarantee its duration over time. The metal frames, following a total cleaning of the surface, pass through chemical conversion processes, creating a compact base that allows for better adhesion of the subsequent treatment. In the last phase the object subjected to the powder coating process is placed in a polymerization oven, going to form an adherent and extremely tight layer durable. This particular paint job is ideal for outdoor use.

To clean the surface, use a damp microfiber cloth with neutral soap or specific metal cleaning products. Avoid hitting or rubbing the surface with sharp objects. Do not use scourers or other abrasive materials, since they would inevitably scratch the surface. Do not leave rusty iron objects on the surface for too long.

These surface treatments are not suitable for outdoor use, but they guarantee excellent resistance to frequent use, dirt and dust.
